3 December 2009

The Politecnico di Milano University in partnership with Fiat Group has organized the second edition of the Master in Transportation & Automobile Design, which will run for 15 months and will be open to 30 graduates. The deadline for applications is 20 December 2009.

The 2009-2010 is the second edition for the "Master in Transportation & Automobile Design", organized by the Politecnico di Milano University – Industrial Design, Arts, Communication and Fashion Department (INDACO) – in partnership with Fiat Group Automobiles.

The Master is open to a maximum number of 30 students with a degree in Industrial Design, Architecture or Engineering. Students will attend more than 1,500 hours of classes spread over a period of 15 months.

The total cost is **9,500.00 Euros**. Requests for admission must be submitted **within 20 December 2009**.

The course is aimed at training new car designers, "focusing on the development of their creativity, in a peculiar and innovative way.

"A theoretical and academic approach will be integrated with practical training finalized to teach the full styling development process as typically used in car industry. "

"Special focus will be given on virtual development tools, on interior design and on understanding of materials and colors."

The master course comes directly from the relationship established between teachers of Politecnico di Milano and FIAT Group Automobiles car designers.

Fiat Group is already supporting several didactical initiatives for the Politecnico di Milano School of Design students, either with internships, or inviting students to participate to car design contests.

Fiat will support this Specializing Master course with direct teaching, to assure coherence with the car design market companies needs. Furthermore, Fiat will offer some students internships inside its Centro Stile.

The Specializing Master in Transportation & Automobile Design has been designed and promoted by Politecnico di Milano School of Design and will be managed by Politecnico di Milano INDACO Department. It will be **15 months long** and has a value of **60 ECTS**.
