

DESIGN FOR KIDS&TOYS

TOY DESIGNER LIST

since 2012 | **MASTER** | 2020/2021

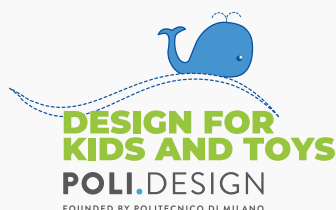

POLITECNICO
MILANO 1863

di par timen t o di design

**CREATIVE
INDUSTRIES
LAB**

FOUNDED BY POLITECNICO DI MILANO

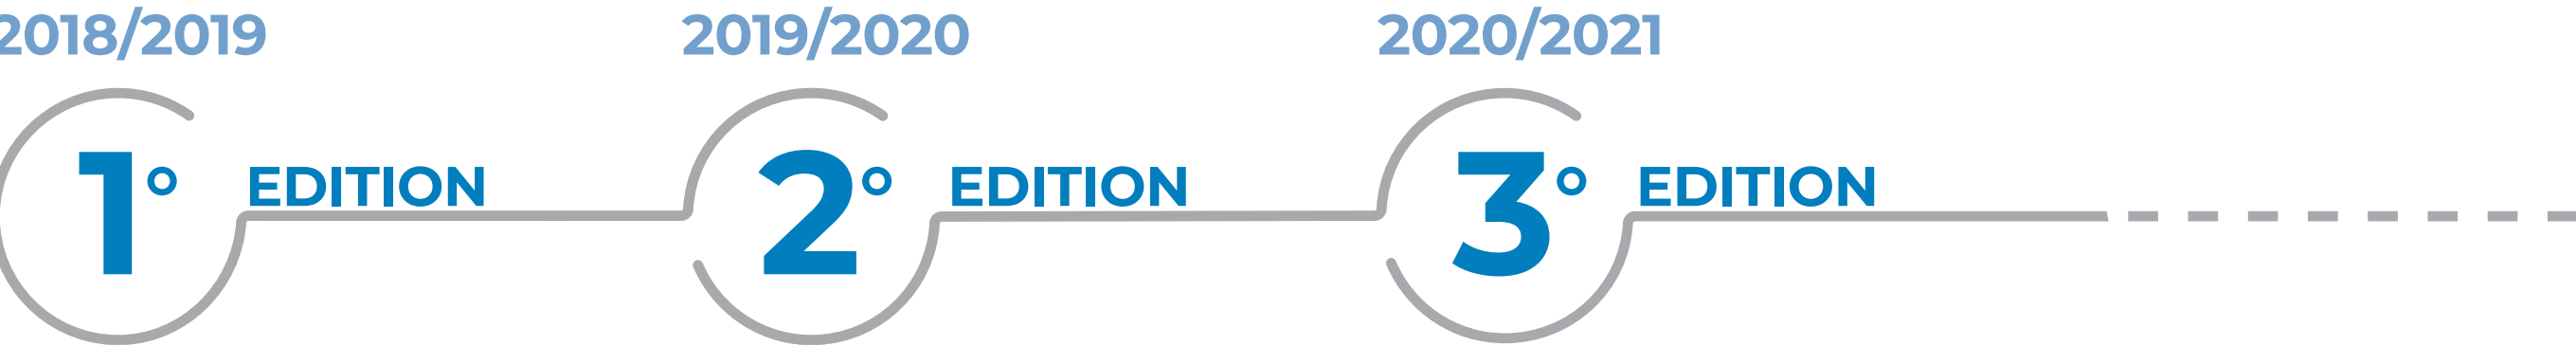

Since **2004** we collaborate with different universities, professors, experts, companies and associations to **develop specific methodologies, tools and knowledge aimed to innovate the pathway to design every product or service for children.**

We always work with **passionate people** aimed at making the whole system of artefacts, that surrounds the child, feasible and insightful.

The Higher Education Course in **Design for Kids & Toys** was the first in Europe dedicated to train specialized professionals in this field, so much so as to have started **the first official Toy Designer List**, created by **Assogiocattoli** and **POLI.design** to distinguish and signal this new category of professionals to the entire design system and, in particular, to companies in the Italian and international toy sector.

For this reason, the first edition of the **Specializing Master in Design for Kids & Toys** opens in 2018.
